

RDS2

on non FM streams

Extended preset system.

A lot of the same

New App Guide: Find The Best Internet Radio App

with **thousands** of internet radio stations to choose from.....etc....

The Truth

**It is not forbidden
to do the same work
several times with lots
of expenses but it is not
the best solution.**

Use the **RDS2** on Internet

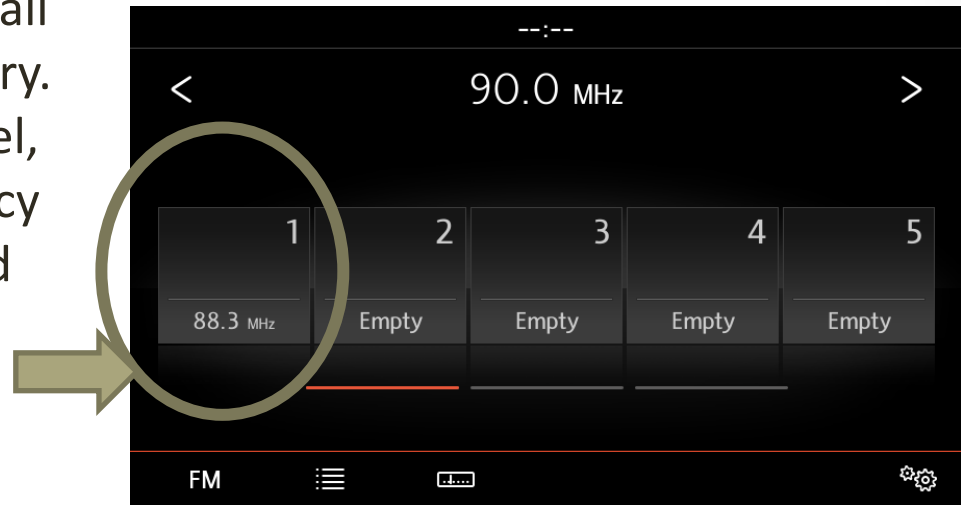

For the radio player does not matter where the sound coming from, and if you use the RDS2-Radio-App you can get what was sent via FM. Including graphical Radio Text and all other things.

Your favorite broadcaster must not build extra Internet site, and no additional player.

This means; the coverage area with all information and advertisement was extended to the world, but the local listener generate no internet streaming costs. Win-Win.

RDS2 extended preset

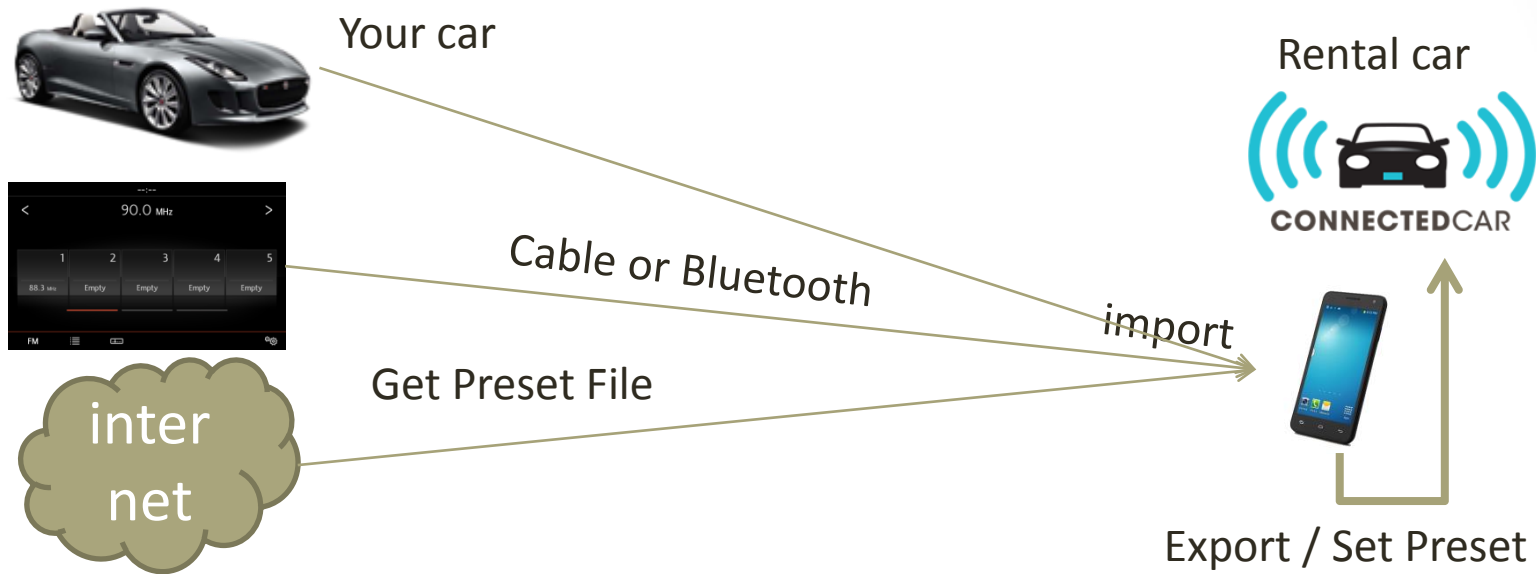

The preset button can contain all information which are necessary. PI code, AF-S, HD Radio channel, Internet address, DAB frequency and Service, AM frequency and other parameters.

RDS2 radios have the intelligence to choose the method which can be used for receiving a station. If it is a connected car or Internet connection is available via WiFi or Smartphone, then also via the Internet.

The xPreset format is standardized and transferable.

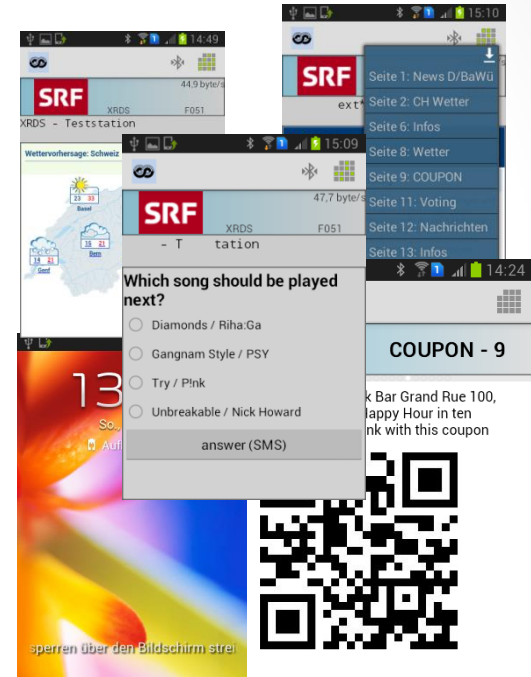

RDS2 preset transport

You can extract the preset out of your car, or as well from the Internet homepages your favorite program, copy via cable or Bluetooth and import into another radio or use in the smartphone itself.

You can have the same Preset in your private and rented car during the holiday. Whether at the place of residence or on another continent. You can also take a nice radio station back home - as a souvenir -.

Always the best show and sound
